

HydroBlok Moisture Barrier

DESCRIPTION: HydroBlok Moisture Barrier Backing is a polymer system designed to meet water resistance needs in commercial carpets. HydroBlok will pass the British Spill Test. It also has excellent wet tuft bind and delamination properties.

FEATURES: HydroBlok is specifically designed for heavy traffic where a moisture barrier is required.

- Available on all tufting technologies
- Excellent tuft bind and edge ravel properties
- Performance properties not affected by moisture
- High performance warranty

APPLICATIONS: Recommended for extra heavy traffic in airports, sports arenas, food service, retail, healthcare, etc.

Specifications:

Primary Backing – Woven Polypropylene

Secondary Backing – Woven Polypropylene

Required Adhesive: Masland Premium Broadloom Adhesive
